# **KEY INFORMATION DOCUMENT.**

## **CFD on a Commodity**

**2021, Tradestone Ltd**

89, Vasileos Georgiou A' street, Office 101,  
Potamos Germasogeias 4048, Limassol, Cyprus

## Purpose

This document provides you (hereinafter the “Client”) with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

## Product

CFD's are offered by Tradestone Limited (hereinafter the «**Company**», «**We**» or «**Us**»), registered in the Republic of Cyprus. The Company is authorized and regulated by the Cyprus Securities and Exchange Commission in the Republic of Cyprus, with license number 331/17. For further information please call +357 25 313540 or go to <https://fbs.eu/en>.

### Alert

**You are about to purchase a product that is not simple and may be difficult to understand.**

## What is this product?

### Type

This investment product is a Contract for Differences (“CFD”) on commodity instrument. A CFD is an Over the Counter (“OTC”) leveraged financial instrument and its value is determined based on the value of an underlying asset. The investor makes a profit or a loss on the CFD based on the direction chosen (Buy or Sell) and the direction of the value of the underlying asset. The CFD is settled in cash only and the investor has no rights whatsoever on the actual underlying asset. This document provides key information on CFDs where the underlying investment that you choose is a commodity derivative instrument such as gold.

### Objectives

The objective of the CFD is to allow an investor to gain leveraged exposure to the movement in the value of the underlying asset (whether up or down), without actually needing to buy or sell the underlying asset. The exposure is leveraged since the CFD only requires a small proportion of the notional value of the contract to be put down upfront as initial margin and is one of the key features of trading CFDs. In the case of commodity CFD, the prices are based on the bid price of the commodity. Prices of this specific investment product may be obtained either by liquidity providers who obtain such prices from the relevant exchanges or directly from the relevant exchanges. The market for commodities is open throughout the week. For specific trading timetable please check the following website <https://www.fbs.eu>.

### Intended Investor

CFDs are intended for investors who wish to make directional transactions and take advantage of short-term price movements in the rates of currencies and have the ability to sustain the risk of loss of their entire investment amount within a short period of time. Those investors have knowledge of, or are experienced with, leveraged products and have a full understanding on how the prices of CFDs are derived as well as the key concepts of margin and leverage.

## Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance of the product at a very high level.

This risk indicator assumes that you keep the product for up to 24 hours. You may not be able to close the product easily or you may have to close at a price that significantly impacts the return on your investment. CFDs may be affected by slippage or the inability to close the product at a desired price due to unavailability of such price in the market. CFDs are OTC products and cannot be sold on any exchange, Multi-Lateral Trading Facility (hereinafter the “MTF”) or other trading venue. There is no capital protection against market risk, credit risk or liquidity risk Performance scenarios (assuming no Overnight Financing effects):

## Performance Scenarios

There are a number of types of trading risk, including leverage risk, which you should be aware of before beginning to trade. Information on factors that affect the performance of this product are detailed below including but not limited to:

- Leverage Risk
- Risk of unlimited loss
- Margin risk
- Conflicts of Interest
- Market Risk
- Unregulated Market Risk
- Market disruption risk
- Foreign exchange risk
- Online trading platform and IT risk

## What are the costs?

The Company charges a spread when an investor trades on CFD. A spread is the difference between the Sell (“Bid”) and Buy (“Ask”) price of the CFD which is multiplied by the deal size. The spread per each underlying asset is detailed on the Company’s website by clicking [here](#). But each investor may have different spreads on all or some of the underlying asset based on the investor’s history, volume, activities or certain promotions.

The below table portrays an illustration of types of costs along with their meaning:

One off costs	Spread	The difference between the buy price and the sell price is called the spread. This cost is realised each time you open and close a trade.
	Currency Conversion	Any cash, realised profit and losses, adjustments, fees and charges that are denominated in a currency other than the base currency of your account, will be converted to the base currency of your account and a currency conversion fee will be charged to your account.
	Commission	A commission of 25\$ per lot size (only WTI and Brent Oil) Approximately 0.06% for 1 lot on each commodity.
Ongoing costs	Daily holding Cost/Swap/Rollover	A fee is charged to your account for every night that your position is held. This means the longer you hold a position, the more it costs. On Wednesdays, Swap is charged 3 times. Swaps can be viewed on the trading platform and the Company’s website.

For the purpose of the example we will assume a transaction of 10 barrels units in WTI Oil with 2 pips spread. A pip in WTI Oil is the 2nd decimal digit in price  $(10 \text{ barrels} * 0.01) * 2 = 0.2\$$ , the spread equals to 0.2\$

The amount of \$0.2 will be deducted from the P/L upon opening the transaction and therefore immediately after opening the transaction the P/L of that transaction will be -\$0.2.

In addition to the above, the Company charges Overnight Financing (OF) for deals that remain open at the end of the daily trading session. This OF may be subject to credit or debit, calculated on the basis of the relevant interest rates for the currencies in which the underlying instrument is traded. The swap fees are available live through the mt4 platform and on the website.

If the CFD's quoted currency differs from the account's currency, it will be converted to the account's currency at the prevailing exchange rates.

If the instrument's Swap type is points, the formula below is used:

Swap Charge = Volume \* Points \* Contract size \* (number of days the positions are held)

If the instrument's Swap type is Money, i.e. USD, the formula below is used:

**Always

**Address:** 89, Vasileos Georgiou A' street, Office 101,  
Potamos Germasogeias 4048, Limassol, Cyprus  
[www.fbs.eu](http://www.fbs.eu)

Swap Charge = Volume \* Money \* (number of days the positions are held)

The above is always converted to the account's base currency.

The costs will vary depending on the underlying investment options you choose. Specific information can be found <https://www.fbs.eu>
